## GREENHECK'S

### eCAPS™ Fan Application Suite

DESIGNED SPECIFICALLY FOR HVAC ENGINEERS

Select and specify fans quicker  
and easier than ever before.

- Available online – no need to install, always up-to-date
- Mobile-ready – iPad and tablet accessible
- Fast and efficient – easy in, easy out
- Compare multiple models simultaneously
- Fan optimization – based on cost, efficiency and sound performance

## Upcoming Events

**July 11**

ASHE Conference

Denver CO.

Custom coils made to fit your needs.

Greenheck manufactures competitively priced, quality-engineered, custom replacement coils for heating and cooling applications. Every coil is leak-tested under water with 450 PSIG of dry nitrogen to guarantee 100% quality assurance. Available for quick build in just 3, 5, or 10 days.

## FEATURED PRODUCT

Discover how WebSentry delivers incomparable value and peak performance for the lifetime of your dehumidifier -- and it's installed at no cost on every Seresco unit we build!

No dehumidifier should be without it  
**...but only Seresco has it!**

Why WebSentry Technology?

- **Peak Performance** – because with WebSentry, the same engineers who designed and built your dehumidifier can remotely observe, control and fine tune its performance during and after installation with control of over 100 critical functions
- **24-7 Remote Monitoring** – WebSentry allows our servers to remotely monitor, record and analyze your dehumidifier performance every 60 seconds, 24 hours a day, 7 days a week and provide real time online data access for operators and authorized service technicians
- **Remote System Control** – allows authorized technicians and service experts to remotely view and change performance parameters in real time via any internet connected device, including smartphones
- **Performance Trouble Alerts** – provide instant email alerts to key personnel should any system parameters not conform to performance expectations
- **Maintenance Reminders** – help ensure scheduled maintenance to maximize performance, boost energy savings and provide the absolute lowest overall cost of ownership of any dehumidifier in the industry

NE Series Dehumidifiers - The Industry Standard for Quality Advanced Dehumidification Technology: Our NE, or Natatorium Environment line of dehumidifiers provide the very best in classic compressorized humidity control. The combination of exceptional engineering and design, plus premium components makes our NE line both energy efficient and exceptionally reliable. The NE series provides peak performance in the range of 10 to 100 lbs. per hour of moisture removal and 650 to 8,000 CFM of air handling. Although our NE line actually extends up to 1000 lbs. of moisture removal and 70,000 CFM of air handling, for larger applications requiring large refrigerant charges, our NP line has taken over as the preferred solution. Fully Featured in Every Size: We break the line into three size categories, with each category providing design innovations, standard features and unique features that competitors don't provide. From homes and spas to hotels, schools and YMCAs, our NE line offers fully featured solutions with plenty of options. Our NE line is also designed to integrate with and provide maximum performance benefits with the Paddock Evacuator chloramine removal system.
